

SUPPLEMENTARY INFORMATION

Table S1. Relative abundance, frequency and functional group of the insect taxa collected in riffles (Rf), pools (Pl) and macrophyte patches (Mc). Functional group assigned to each taxon is shown: GC (Gathering collectors), FC (filtering collectors), SC (scrapers), SD (shredders), PR (predators), cg (clingers), sp (sprawlers), sw (swimmers), dv (divers), cb (climbers), bw (burrowers). Adult (ad) and larval (lv) stages are shown in brackets and taxa codes used in rank abundance curves (Fig. 2) are included in the last column.. *Abundancia relativa, frecuencia y grupos funcionales de insectos recolectados en rápidos (Rf), pozas (Pl), y parches de macrofitas (Mc). Se muestran los grupos funcionales asignados a cada taxón: GC (recolectores), FC (filtradores), SC (raspadores), SD (desmenuzadores), PR (depredadores), cg (agarradores), sp (reptadores), sw (nadadores), dv (buceadores), cb (trepadores), bw (excavadores). Los estados adulto (ad) y larval (lv) se muestran entre paréntesis y los códigos de los taxa utilizados en las curvas de rango abundancia (Fig. 2) se incluyen en la última columna.*
